

# Fichas de ajedrez

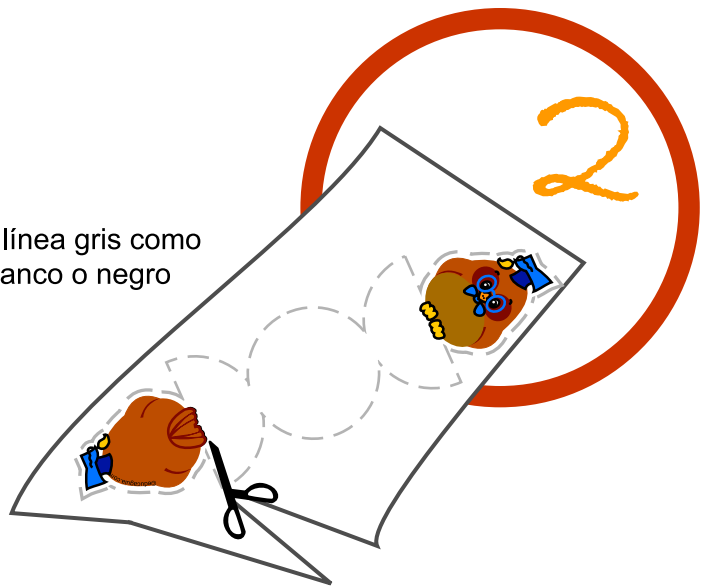

## Imprime las hojas con las figuras.

Si la imprimes en cartulina o algún papel más grueso que los folios normales, la figura te quedará más fuerte y aguantará más tiempo.

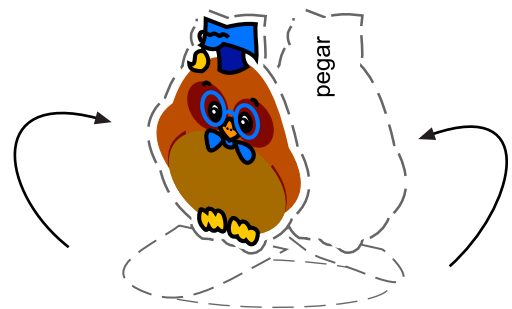

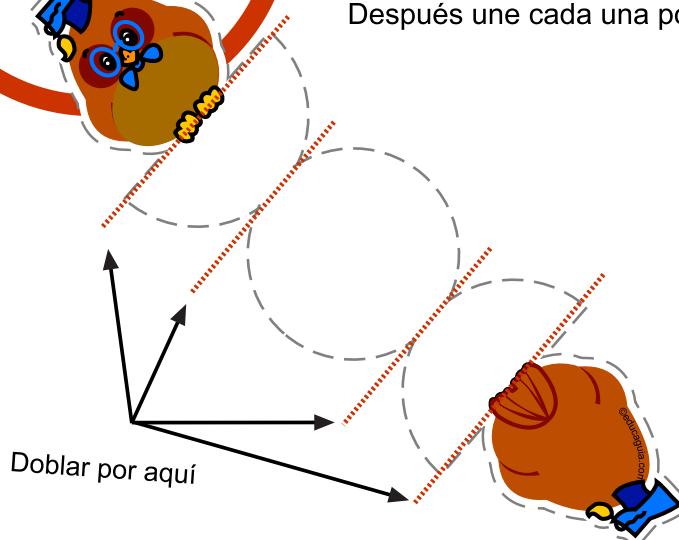

## Recorta por la línea de rayas.

Una vez hayas impreso las figuras, recórtalas por la línea gris como marca el dibujo; comprobarás que hay un reborde blanco o negro rodeando cada figura.

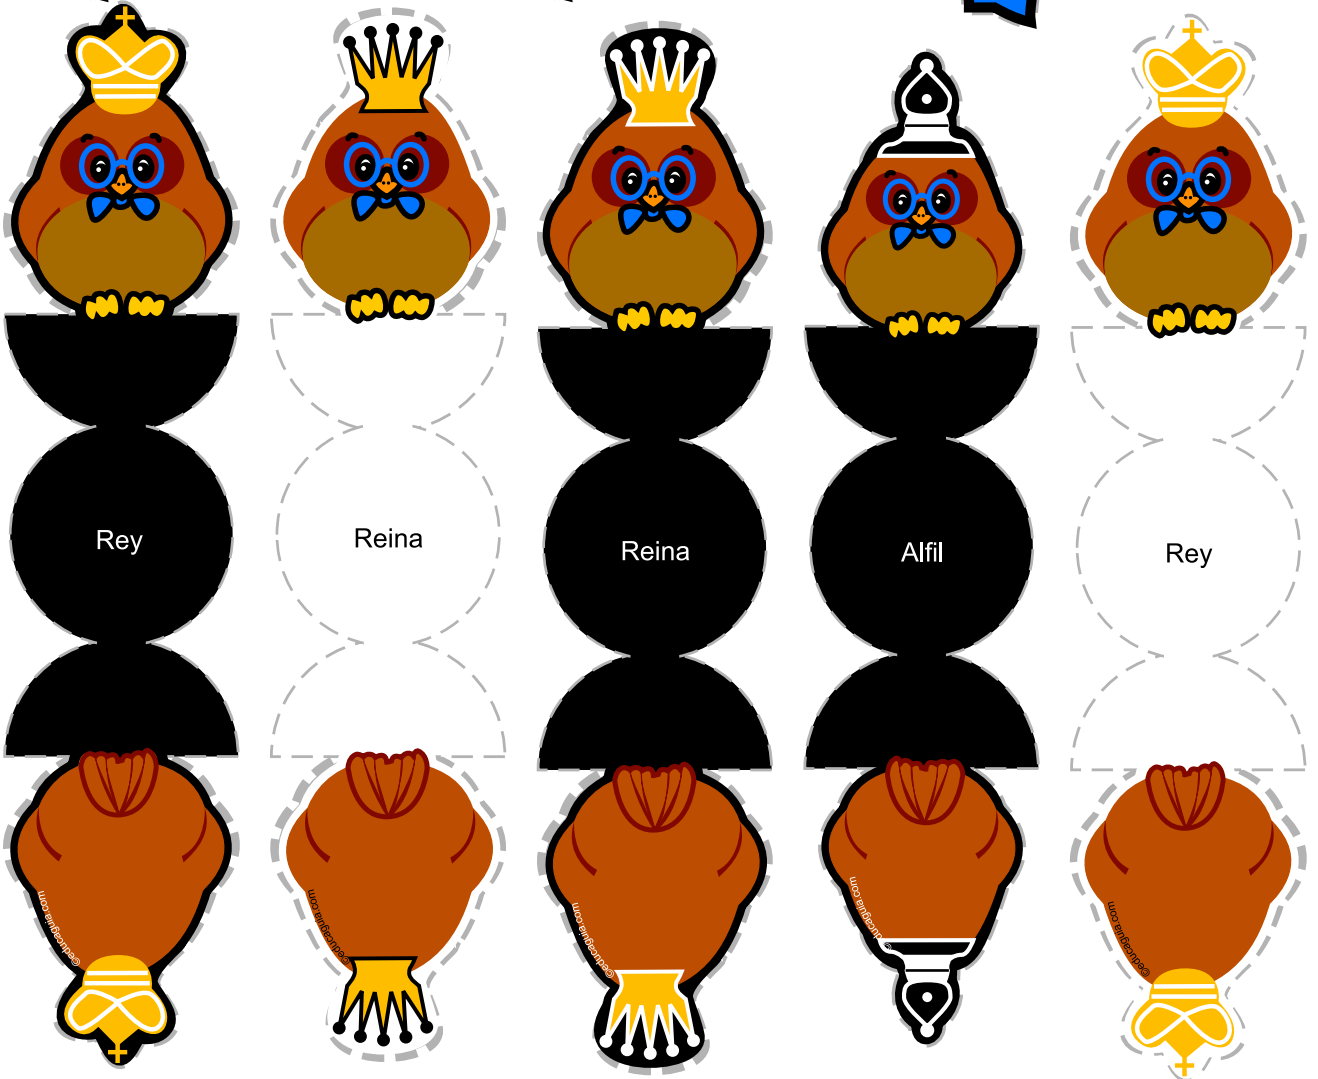

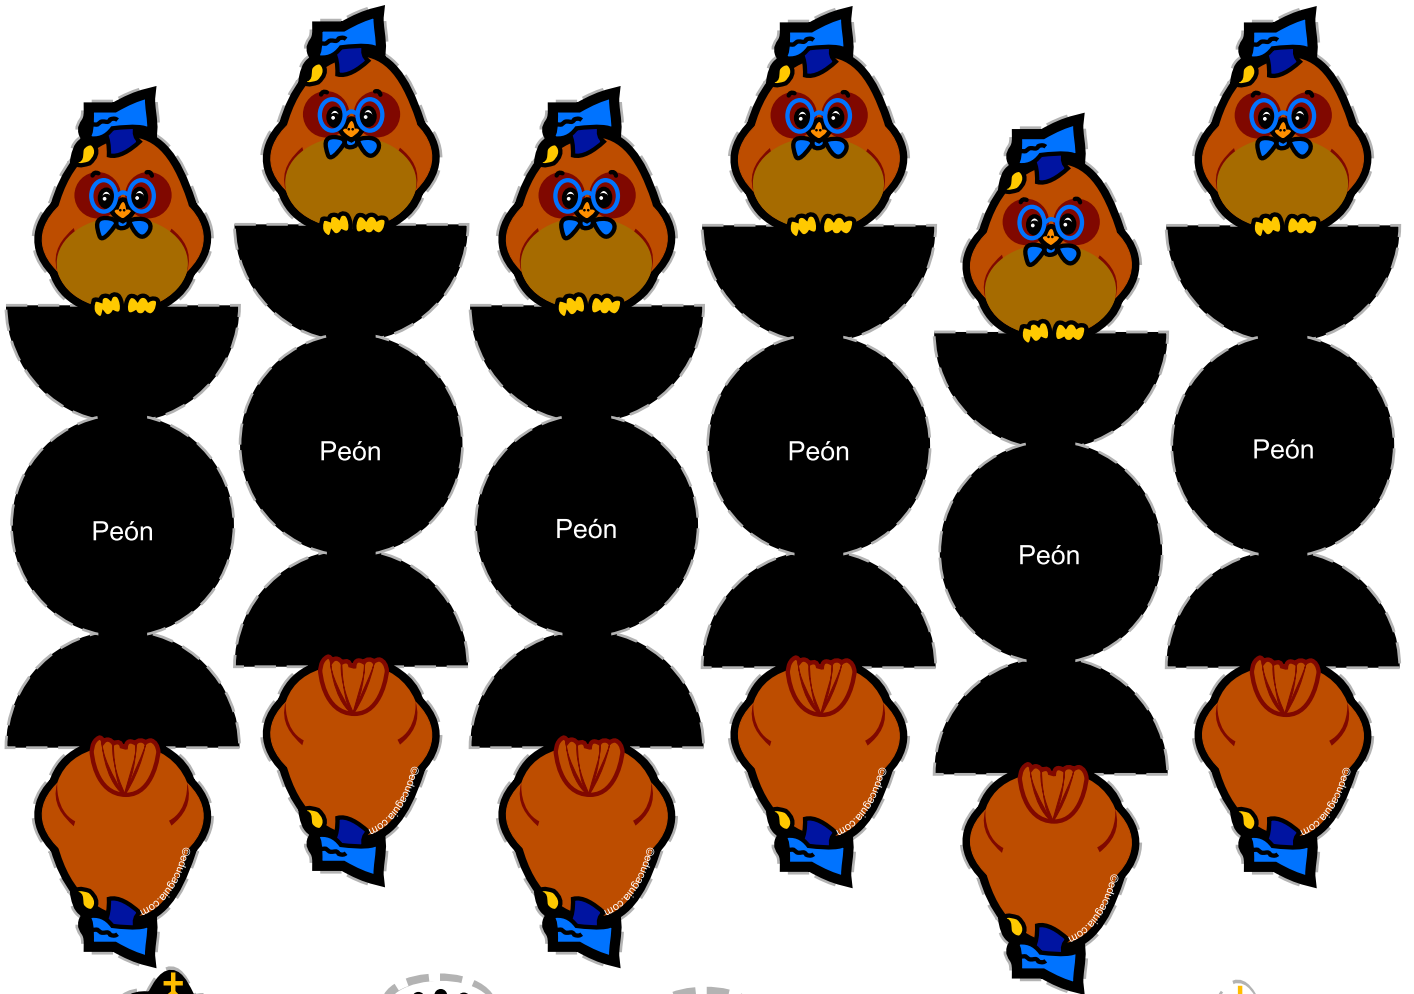

## Prepárate para doblarlos.

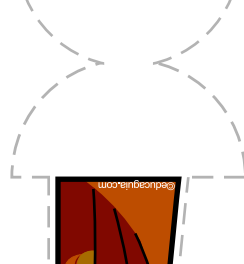

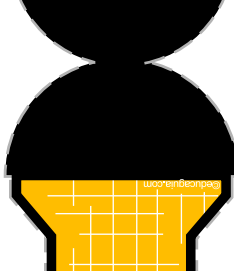

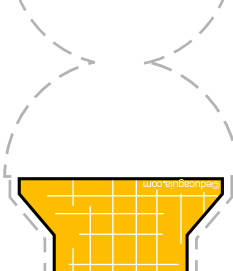

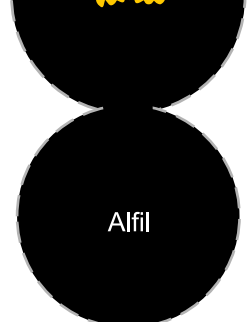

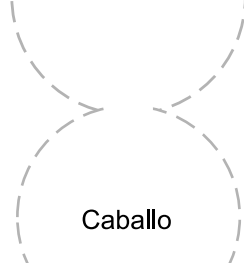

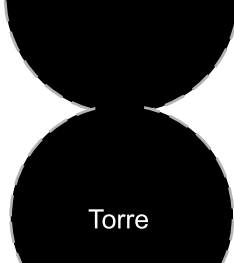

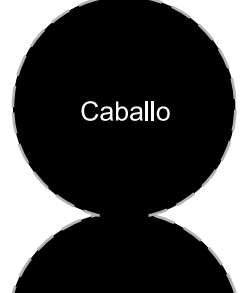

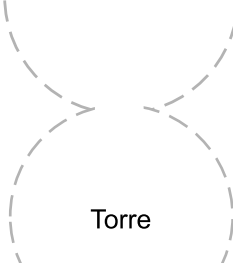

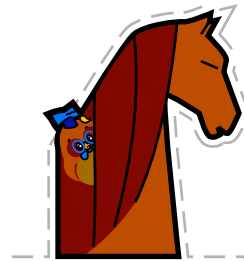

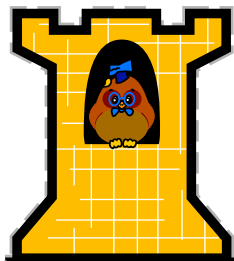

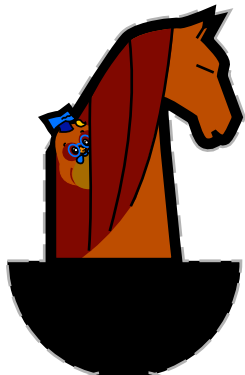

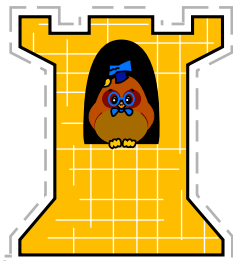

Ahora que ya están recortados, debes doblarlos exactamente por donde se señala en el dibujo. Después une cada una por la parte blanca del dibujo y pégalas.

## TRUCOS:

- Recuerda que puedes bajarte las figuras en color o en blanco y negro, así podrás elegir los colores tu mismo.
